

Edna Tunney, MEd

Resonant Light Technology

<https://www.resonantlight.com>

Ms. Edna Tunney has had careers as a physical education teacher of grades from K to 12, in real estate, and later as an energy healing and body work practitioner. She developed positive thinking courses, implementing them—along with therapeutic touch, reflexology and dream therapy—into adult continuing education courses. In the late 1980s, she obtained her Masters in Counseling Psychology and worked in a secondary school setting for a decade. In 2002, she met and married Donald Tunney, the founder of Resonant Light Technology. Inspired and touched by Don's vision, and the impact that Resonant Light Technology was having on healing people worldwide, she utilized her skills to run the company after Don's passing in 2009. Ms. Tunney has traveled to many countries, including Norway, Korea, United Arab Emirates, Hong Kong, Taiwan, the Philippines, Argentina, and all over the United States, to share the benefits of Rife Therapy and vibrational therapies.
